

Hampstead, NH 2024 Rain Barrel Program

Be Part of the Solution

Climate crisis is intensifying the water cycle, making wet periods wetter and dry periods drier. Severe droughts can make both rainfall and flash flooding more severe, creating *weather whiplash* events. When heavy rain falls over drought-stricken soil — which is often hard and cracked — it cannot soak into the ground, and becomes runoff.

Rain Barrels Can Be Part of the Solution

- Rain water is an alternate source of water during droughts
- Decrease your water bill by up to 40%
- Rain water is a healthy, chlorine and chemical-free water source for plants and gardens
- Rain barrels help reduce pollution, erosion and improves local watershed health by collecting runoff rain from roofs and gutters
- Lower municipal water demands & save energy at treatment plants

About The Great American Rain Barrel

- 100% re-purposed, food grade, UV protected and BPA free barrels. **Produced in Massachusetts.**
- Most durable rain barrels on the market: 3/16" wall thickness. Screen filtered to keep mosquitoes out.
- Will last for years when properly drained & stored for winter. Pay for themselves in one year.
- Several rain barrels can be linked together — easy 5-minute setup
- **Available Colors:** Forest Green, Earth Brown, and Nantucket Grey. Also available unpainted.

How to Purchase Your Rain Barrel

Rain Barrels are available for purchase by residents at the discounted price of \$95.00.
